AI-DASH

Vertical Smart Room

 **A.I. Tech**
The Vision of the future. Now.

AI-DASH VERTICALS

Customize **AI-DASH** through the verticals by adding new capabilities designed for specific application domains.

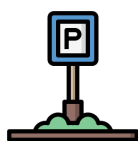

SMART SURVEILLANCE

Add a user interface designed to visualize and manage alarms turning AI-DASH into an *Event Management System*.

SMART ROOM

An easy and user-friendly tool to effectively manage shared working spaces like classrooms, museums, stores and so on.

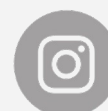

SMART PARKING

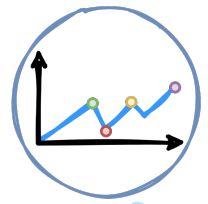

Designed to simplify the management and monitoring of parking areas through access lists, chats, maps and usage statistics of spots and areas.

SMART STATIONS

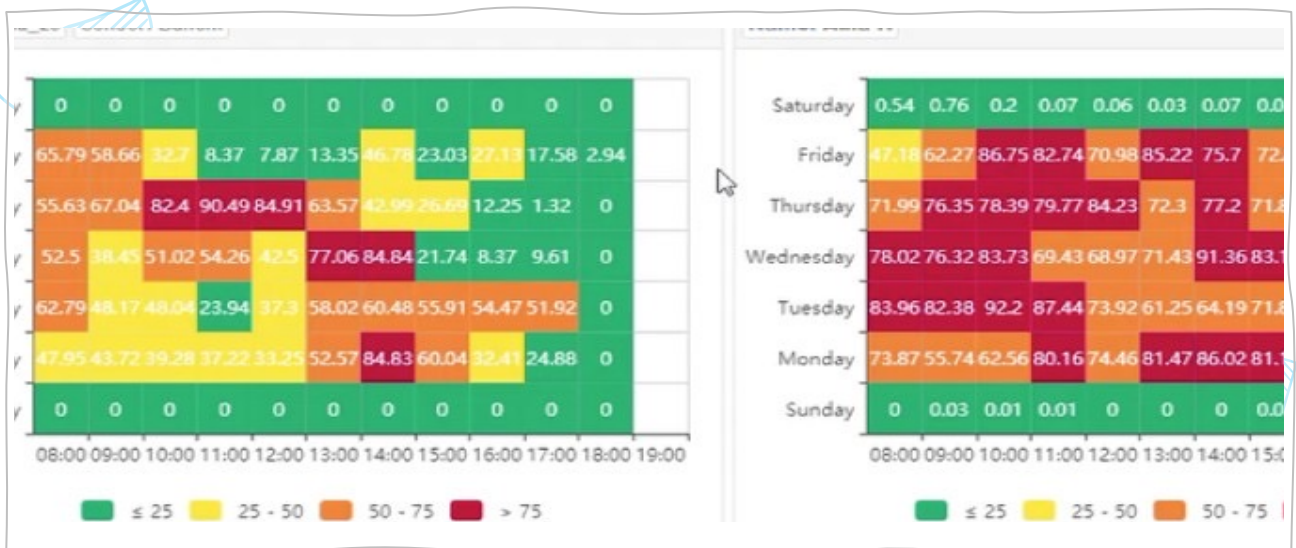

This vertical allows AI-DASH to be an effective tool to manage railway, maritime or bus stations thanks to map and table showing the estimated number of people on platforms, stops and waiting areas in real-time.

SMART ROOM

SMART ROOM is the vertical designed to provide an easy and intuitive tool to effectively manage shared rooms, spaces and workspaces such as classrooms or meeting rooms. For instance, it allows to have a quick and smart visualizations of room usage in a give time period in order to optimize the energy consumption related to heating, cooling or lighting systems.

Collecting data coming from different devices

Aggregating and visualizing data over monthly and yearly time intervals on a compact unique view

Optimizing staff shifts

Optimizing spaces allocation and usage

Optimizing energy consumption
