# AI-DASH

Vertical Smart Surveillance

 **A.I. Tech**  
The Vision of the future. Now.

# AI-DASH VERTICALS

Customize **AI-DASH** through the verticals by adding new capabilities designed for specific application domains.

## SMART SURVEILLANCE

Add a user interface designed to visualize and manage alarms turning AI-DASH into an *Event Management System*.

## SMART ROOM

An easy and user-friendly tool to effectively manage shared working spaces like classrooms, museums, stores and so on.

## SMART PARKING

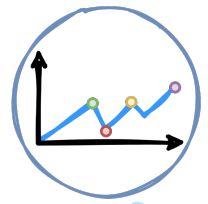

Designed to simplify the management and monitoring of parking areas through access lists, chats, maps and usage statistics of spots and areas.

## SMART STATIONS

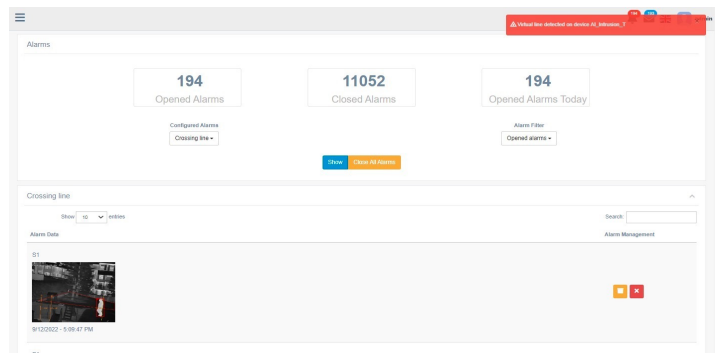

This vertical allows AI-DASH to be an effective tool to manage railway, maritime or bus stations thanks to map and table showing the estimated number of people on platforms, stops and waiting areas in real-time.

# SMART SURVEILLANCE

In addition to the functionalities already in **AI-DASH** to manage alarms, **SMART SECURITY** provides a user interface to visualize and manage alarms, turning AI-DASH into an advanced Event Management System that also allows to define rules to combine alarms coming from multiple devices.

Collecting alarms from video analytics applications

Visualize events of interest with or without images

Manage alarms in a unique user-friendly interface

Temporal aggregation of alarms [AND rules]

Sending notification to third-party systems

Sending notification through e-mails and popups

Monitoring the availability of devices
